

Title	Catalyst EC Audio DAC EOL
Affected Products	Catalyst EC Carrier Board, Catalyst EC Combo, and Catalyst EC Development System
PCN #	PCN13003
Date	July 18, 2013

**Summary**

The audio codec utilized on Catalyst EC carrier board, IDT Audio DAC 92HD71B8X3NLGXB3X, will be changed in future production builds. The replacement part is identical except for the device ID.

*Note – a future change to different audio codec solution for longer term production update is being considered by Eurotech product management. Contact your Eurotech technical support or sales representative for updates on status and any future transition details.*

**Impact**

A system using the Catalyst EC carrier may require reload of the device driver within the operating system due to this difference in audio codec device ID. The impact will depend on the operating system used and the method of OS build employed by customer.

**Description of Product Change**

The device ID is the only difference between the old and new audio codecs.

	IDT Audio DAC Part Number	Device ID
