#### Notice:

##### Summary

Our records show that you have purchased one of the variants of PROTEUS J777 boards or a system which includes this product. It is Eurotech's policy to inform customers of any planned End-Of-Life (EOL) process prior to final production to allow time to order sufficient product to maintain your long-term production requirements or to allow for a managed product migration to a new product. This PN serves as notification of the planned End-of-Life (EOL) of this standard product and all custom derivatives.

##### Products Affected

658x-00777-00x-101 – All PROTEUS J777 board variants (Standard and custom)

##### Reason for EOL

Several components used on the PROTEUS J777 board version have been discontinued by their respective manufacturers with no alternative offering that meets the existing component form, fit or function.

##### Important Dates

Last order date – 30<sup>th</sup> May 2013  
Last shipment date – 31<sup>st</sup> July 2013

These dates are provided in order to allow you to plan any migration effort you may need.

##### Product Migration

Customers requiring a migration path for their applications from the PROTEUS J777 are recommended to view the newer board variant PROTEUS J816, this uses the same base processor/chipset in a larger device package and supports the same board interfaces. A description of the differences between the J777 and J816 is available in the PROTEUS board manual available from the Eurotech website.

If you would like to discuss product migration please contact your local Eurotech Sales office who will be able to offer advice.
